

# I-465/56th Street

**From April 2 to November 15, the following ramps will be closed on the city's northeast side (red ramps):**

- Northbound I-465 to westbound 56<sup>th</sup> Street
- Southbound I-465 to eastbound 56<sup>th</sup> Street
- Westbound 56<sup>th</sup> Street to southbound I-465
- Eastbound 56<sup>th</sup> Street to northbound I-465

Northbound and southbound traffic from I-465 wishing to travel east or west on 56<sup>th</sup> Street will use the remaining diamond exit ramps (green ramps) to 56<sup>th</sup> Street. Temporary stoplights have been placed at the top of the ramps to facilitate left and right turn movements.

In addition, the northbound and southbound collector-distributor from I-465 to Shadeland Avenue will close from April 3 until November 15 for reconstruction. Northbound I-465 traffic to Shadeland Avenue will follow a detour route which utilizes 56<sup>th</sup> Street west to Emerson Avenue to Fall Creek north to Shadeland Avenue. Southbound Shadeland Avenue traffic and I-465 traffic to Shadeland Avenue will utilize the exit ramp at 56<sup>th</sup> Street and get on the 56<sup>th</sup> Street entrance ramp to southbound I-465 and exit at Shadeland Avenue. Later in April, additional restrictions for southbound Shadeland Avenue traffic will be implemented.

Finally, all traffic on 56<sup>th</sup> Street over I-465 between Caito Drive and Brendon Way will be crossed over onto the eastbound lanes while the westbound bridge over I-465 is replaced. The crossover will begin April 2 and last until November 15 with a phase change occurring in August for the construction of the eastbound bridge. Traffic will be restricted to one lane in each direction.

Additional restrictions will be forthcoming as the project moves toward completion.
